

Georgy Savva

georgy.savva@nyu.edu | georgysavva.github.io | github.com/georgysavva

SUMMARY

Computer science student with 8 years of professional software engineering experience and self-taught foundations in deep learning, reinforcement learning, NLP, and computer vision.

SKILLS

Languages: Python, SQL, Go, TypeScript

Libraries: PyTorch, TensorFlow, Numpy, Pandas, FastAPI, React, Node.js

Applications: Docker, Kubernetes, PostgreSQL, AWS, GraphQL, Hasura

EDUCATION

New York University

Master of Science in Computer Science, Courant Institute of Mathematical Sciences

New York, New York

2024 – Expected 2026

Russian University of Cooperation

Bachelor of Science in Computer Science

Moscow, Russia

2019 – 2021

National Research Nuclear University MEPhI

2 years toward Bachelor of Science in Computer Science

Moscow, Russia

2014 – 2016

PROJECTS

Open-Source Library Scany

May 2020 – Present

- Created an open-source library to map data from a database into Go objects. The library has 1,200 stars on GitHub and is used by thousands of companies

EXPERIENCE

Technical Co-Founder

Scifind

Jul 2022 – August 2023

Los Angeles, CA

- Launched a troubleshooting platform for bioscientists into production, gaining 4,000 MAU in the first 2 months
- Led the development of the product with a team of 2 engineers using TypeScript, Next.js, and Node.js

Senior Software Engineer

IOTA

Jan 2021 – Jul 2022

Berlin, Germany

- Developed the new network layer of the node using libp2p, decreasing the number of peering errors by 70%
- Set up automatic deployment via Ansible and GitHub Actions, accelerating the development speed by 25%
- Introduced Go guidelines to the project and tools to ensure them, reducing the frequency of bugs by 2 times

Senior Software Engineer

Elsa

Jan 2020 – Jan 2021

San Francisco, CA

- Implemented App Store and Google Play in-app subscriptions as microservices using FastAPI, which improved the correctness of billing by 50%
- Integrated payment gateway Instamojo, increasing the number of app purchases in Asia by 3 times

Software Engineer

Edwin.ai

Mar 2017 – May 2019

San Francisco, CA

- Participated in building the English tutor chatbot from a prototype stage to being the top 1 bot on Facebook
- Implemented a YAML-file-based framework for building dialog systems, which allowed the company to launch a new product on Google Assistant
- Designed a distributed queue using PostgreSQL to handle messages from 800,000 users
- Developed the user knowledge graph service using Neo4j, improving the performance of read queries by 3 times

Software Engineer

Snaappy

Jun 2016 – Mar 2017

Moscow, Russia

- Rewrote the messaging service in Go, which increased the backend performance by 5 times
- Migrated the chat storage from PostgreSQL to MongoDB, allowing horizontal scalability for the data layer
- Implemented a WebSocket service for real-time updates using Go, driving user engagement by 30%
